

Kaushal Ganatra

FULL STACK SOFTWARE ENGINEER

Rajkot, Gujarat, India | kaushal.d.ganatra@gmail.com | +91 94270 06318 | linkedin.com/in/kaushal-ganatra | github.com/KaushalGanatra | Portfolio: kaushalganatra.dev

PROFESSIONAL SUMMARY

Fullstack Developer (.NET + React) with 2+ years of experience building scalable web applications. Experienced in leveraging AI-assisted development workflows using Claude Code, with strong focus on context engineering, backend systems, and performance optimization

AI-ASSISTED DEVELOPMENT & CONTEXT ENGINEERING

- Integrated Claude Code and Claude Superpower into daily development workflows to accelerate coding, debugging, and code review tasks
- Applied context engineering techniques to improve accuracy, consistency, and production readiness of AI-generated code
- Applied structured context and reusable SKILL-based patterns to reduce ambiguity and improve AI output consistency
- Leveraged AI for backend-heavy tasks including API design, query optimization, refactoring, and code review
- Collaborated with team to refine AI usage practices and improve development efficiency across projects
- Practiced token-efficient approaches to balance performance, cost, and reliability
- Hands-on experiments with Claude Code and Claude Superpower for prompt/context control, leveraging structured agent workflows (inspired by Matt Pocock's SKILL-based engineering practices) and behavior-guided execution patterns derived from Andrej Karpathy's LLM insights (e.g., goal-driven tasks, reduced overengineering, and explicit validation loops)

WORK EXPERIENCE

Full Stack Software Engineer

Nov 2024 – Present

ez enRoute Pvt. Ltd. (Acquired by Zonar Systems, USA) · Rajkot, India · International Exposure

- Spearheaded the modernization of a 5-year-old legacy platform, leveraging AI tools to slash development effort.
- Overhauled system architecture to maximize scalability, modularity, and overall user experience.
- Integrated AI-driven code generation and refactoring workflows to accelerate team velocity and productivity.
- Architected high-performance RESTful backend services using .NET Core, driving scalable application workflows.
- Engineered modular React.js frontend interfaces, significantly enhancing data visualization and user experience.
- Optimized PostgreSQL database models, ensuring robust data consistency and accelerating query retrieval times.
- Integrated advanced geospatial analytics to empower data-driven business decision-making.
- Utilized AI-assisted development tools (Claude Code) to accelerate feature delivery, improve debugging efficiency, and support system-level design decisions.

Software Engineer Intern

Jan 2024 – Sep 2024

Improwised Technologies Pvt. Ltd. · Rajkot, India

- Engineered scalable backend REST APIs using Golang (Go Fiber) and MVC architectural patterns.
- Developed dynamic frontend features with Vue.js and Nuxt.js, ensuring seamless cross-tier data integration.
- Standardized development and deployment workflows by containerizing applications with Docker.
- Streamlined release processes through CI/CD pipelines and actively contributed to open-source issue resolution.

Freelance Website Designer and Developer

Sep 2022 – Nov 2022

Self-Employed · Client: Unfiltered Gup-shuP · Remote

- Delivered an end-to-end WordPress platform for 'Unfiltered Gup-shuP' open mic events, managing all phases from requirements to deployment.
- Designed a highly responsive, intuitive UI using Elementor to optimize mobile and desktop user experiences.
- Drove community engagement by integrating and configuring a dynamic content publishing blog module.

Shopify Developer

Apr 2020 – Sep 2021

Vertex Dimension · Remote · International Client

- Customized and launched Shopify storefronts using Liquid, engineering tailored e-commerce solutions across diverse industry domains to meet unique business requirements.
- Optimized backend logic and product workflows, demonstrably improving platform performance and usability.
- Led and mentored a 2-person development team, providing technical guidance and streamlining workflows to ensure high-quality delivery.
- Served as the primary technical liaison between clients and the development team, translating business requirements into actionable tasks and managing client communications.

TECHNICAL SKILLS

Languages: C#, Golang, Python

Frameworks: .NET Core, React.js, Vue.js, Nuxt.js

Backend/APIs: REST APIs, Microservices, System Design, Scalable Architecture

Cloud/DevOps: Docker, CI/CD, Terraform, Linux

Databases: PostgreSQL, MySQL, SQLite

AI Tools & Practices: Claude Code, Context Engineering, AI-Assisted Development, SKILL-based Workflows

Other: Open-Source Contribution

EDUCATION

Master of Computer Applications (MCA)

Marwadi University, Rajkot

2022 – 2024 · CPI: 7.86 / 10

Bachelor of Computer Applications (BCA)

Christ College, Rajkot

2019 – 2022 · CGPA: 8.53 / 10

Gold Medalist — Top Academic Performer

PROJECTS

MyLinkZ — Social Media Link Manager

Technologies: Android, Java, SQLite

- Developed an application for creating personalized Linktree-style profiles with secure account generation.
- Implemented a seamless QR code sharing facility to easily scan and add other users' social contact profiles.

WhatsApp Chat Analyzer

Technologies: Python, Streamlit, Data Visualization

- Built a data analysis tool capable of parsing uploaded WhatsApp conversation exports to extract deep insights.
- Engineered interactive data visualizations including total message counts, word usage graphs, timelines, and individual member activity metrics.

MileageMeter — Vehicle Mileage Tracker

Technologies: Android, Java, SQLite

- Created a utility application to dynamically calculate and log vehicle mileage based on current kilometers and fill-up costs.
- Designed a persistent tracking system for historical fill-up details, featuring custom date selection and comparative analysis.

CERTIFICATIONS

- Career Essentials in Generative AI by Microsoft and LinkedIn
- Google Cloud Big Data and Machine Learning Fundamentals by Coursera
- AWS Cloud Technical Essentials by Coursera
- Project Management Fundamentals by IBM

ACHIEVEMENTS

- Gold Medalist in BCA, top academic performer across the entire batch.
- Hackathon participant, built a real-time solution leveraging CCTV feeds and image detection systems.
